Gary Friedman
President
EZ-Flo Nozzle & Equipment Co.
Post Office Box 2398
Covina, CA 91722

#92-17

Dear Mr. Friedman:

Certification of EZ-flo Rebuilt 4001 Nozzle Bodies with
Emco Wheaton A4011 and A4015 Spout and Bellows Assemblies

You requested certification for the EZ-flo rebuilt short-spout nozzles. These short-spout nozzles will be composed of the same rebuilt nozzle body used in the currently certified EZ-flo rebuilt 4000-series nozzles, with the certified Emco Wheaton spout and bellows assemblies. These rebuilt nozzles will be marketed as EZ-flo 4011 and 4015 nozzles. As you know, certification must be requested and obtained before a spout and/or bellows assembly produced by EZ-flo may be used on these nozzles.

I find that the EZ-flo 4011 and 4015 nozzles, as described above, will not adversely affect Phase II vapor recovery systems on which they may be installed. Therefore, the EZ-flo 4001 and 4005 short-spout coaxial balance-type vapor recovery nozzles are certified for use with Phase II gasoline vapor recovery systems.

If you have any questions, please call Laura McKinney, Associate Air Pollution Specialist, at (916) 327-1525.

Sincerely,

James J. Morgester, Chief
Compliance Division
